# Putukaväila projektiala

## The Project Area

Putukaväil kulgeb ca 13,5 km pikkusel trajektooril piki tänast kõrgepingeliinide koridori ja endist raudteetammi läbides 3 linnaosa ja piirnedes 3 linnaosaga.

The Pollinator Highway spans 13,5 kilometres along a former railway dam and today's transmission tower corridor through 3 districts of Tallinn while bordering another 3 districts.

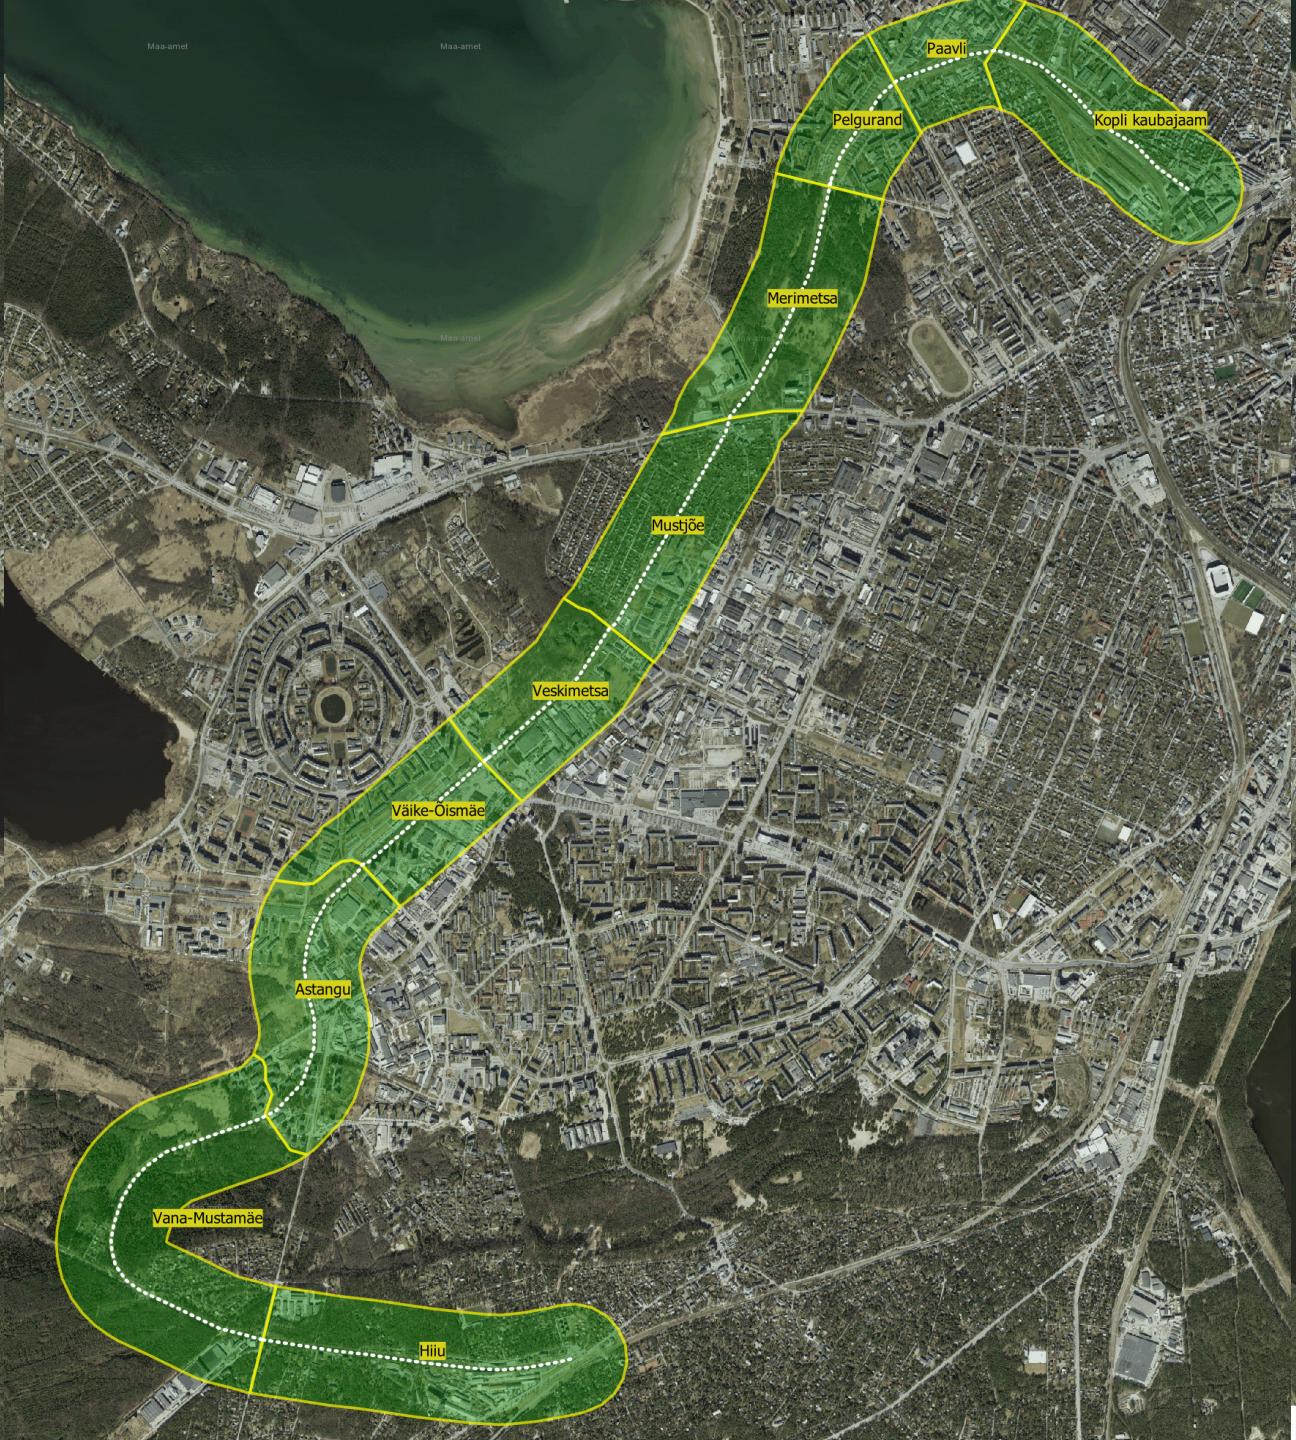

# 10 omanäolist ruumiosa

## 10 Distinctive Spaces

Uuring käsitteb Putukaväila 300 + 300 m laiuse ruumikoridorina, mis on jagatud - lähtuvalt täna esinevatest linnaruumilistest katkestustest - 10 ruumiosaks.

Pollinator Highway is studied as a 300 + 300 metres wide green corridor, which is divided into 10 spaces based on strong spatial dividers that exist today.

# Elu- ja liigirikkus

## Species-richness

Liigirikkamad piirkonnad  
Putukaväilal ja selle lähialal on  
Astangu, Mäeküla, Vana-Mustamäe  
ja Veskimetsa asumid.

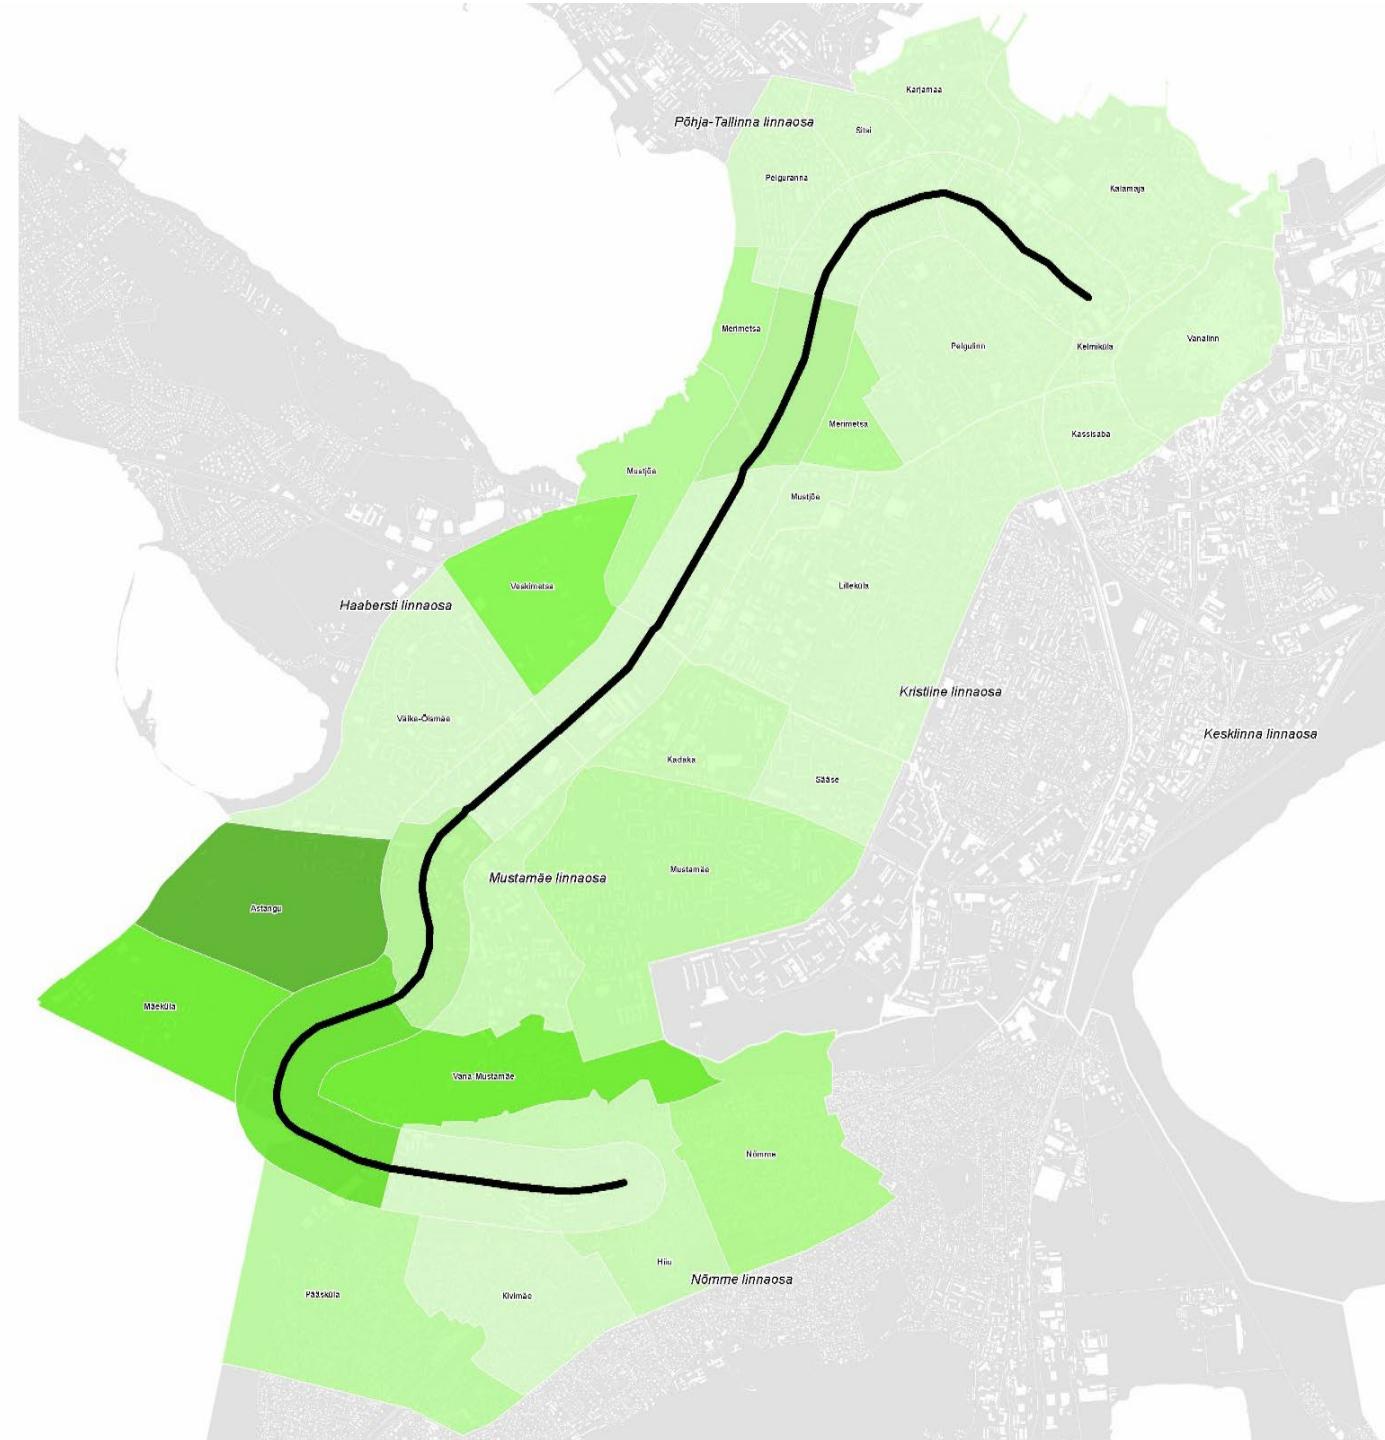

The most species-rich areas on and  
near the Pollinator Highway are  
Astangu, Mäeküla, Vana-Mustamäe  
and Veskimetsa subdistricts.

**Liigivaesem keskkond**  
Less species-rich environment

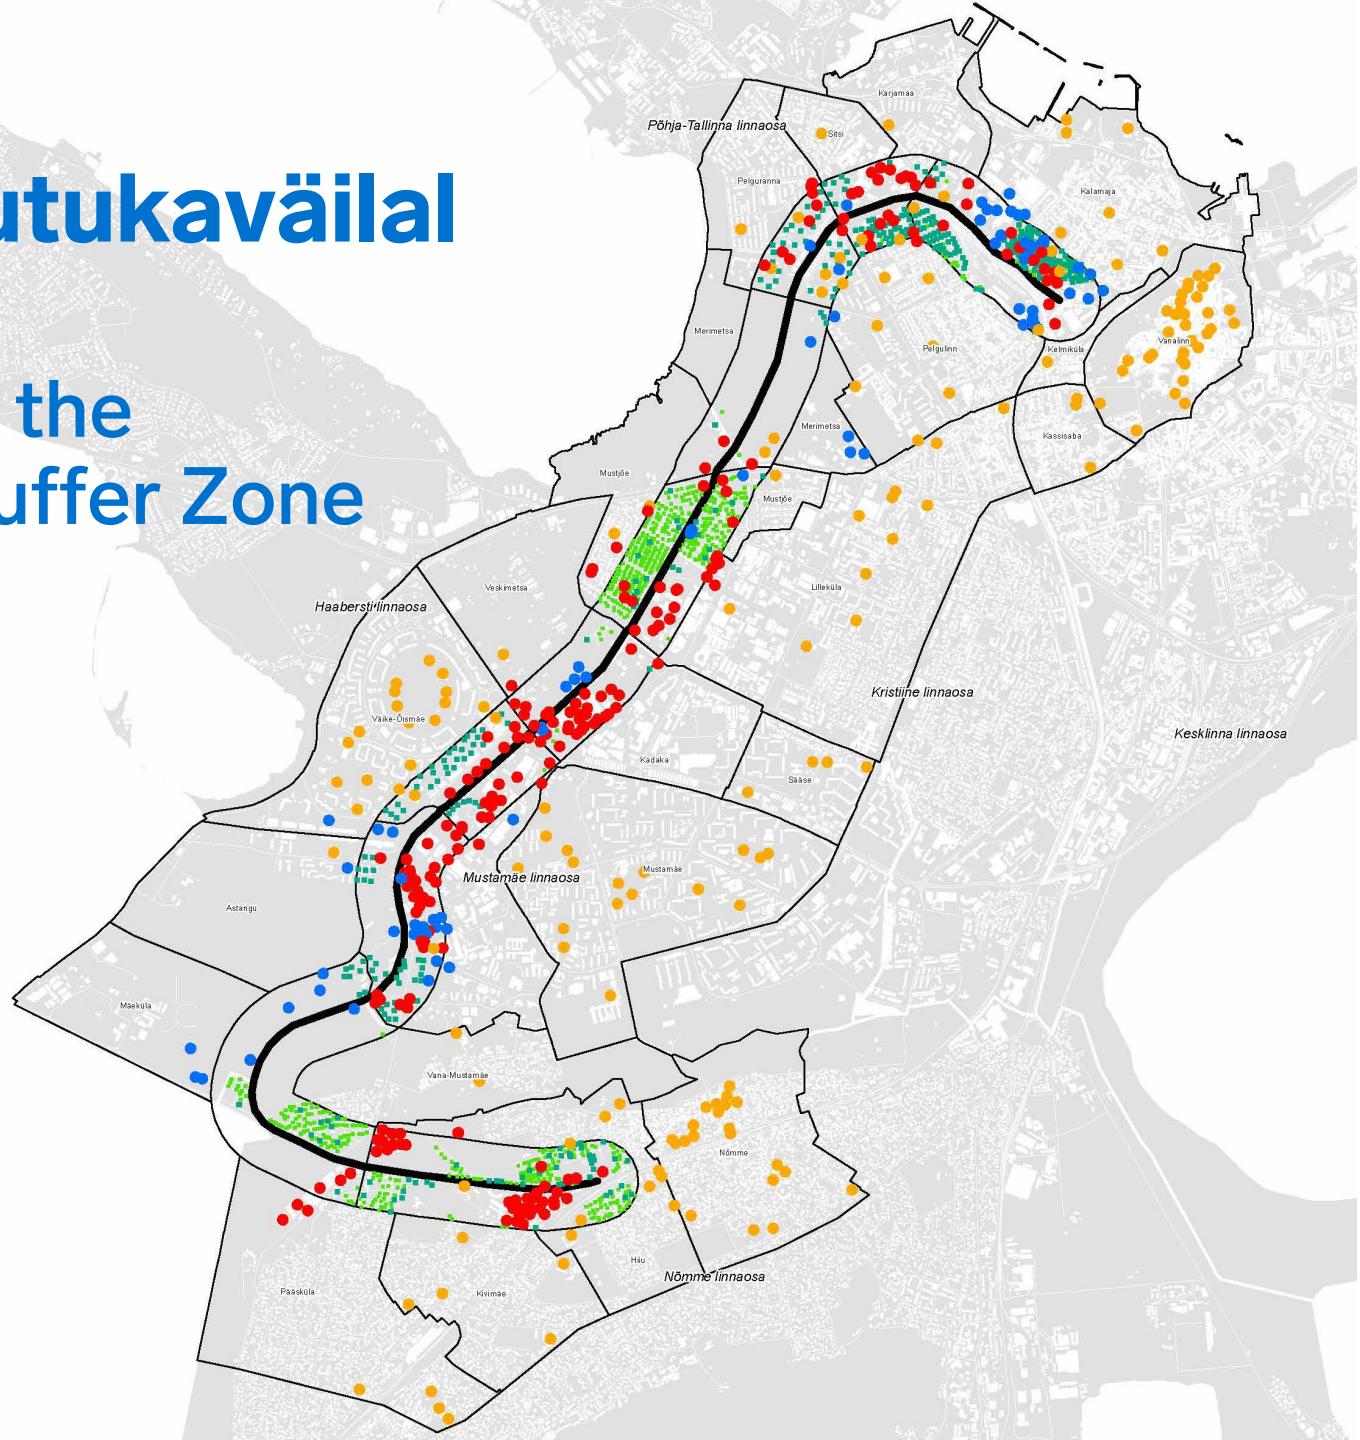

**Liigirikkam keskkond**  
Remarkably species-rich environment

# Põhilised huvigrupid Putukaväilal ja selle mõjupiirkonnas

## Main Stakeholder Groups on the Pollinator Highway & in Its Buffer Zone

- Avalik funktsioon  
Public function
- Aktuaalsed detailplaneeringualad  
Relevant detail zoning plan areas
- Ettevõtted & ärid  
Businesses & entrepreneurs
- Tänased korterelamud  
Apartment buildings today
- Tänased pereelamud  
Single-family homes today

# **Elanikud & ärid Putukaväilal ja selle mõjupiirkonnas**

## **Residents & Businesses on the Pollinator Highway & Its Buffer Zone**

Ca 40% Tallinna elanikkonnast elab Putukavälast kuni 30 minutilise jalutuskäigu kaugusel.

Ca 40% of the residents of Tallinn live within a 30 minute walking distance to the Pollinator Highway.

Ca 175 000 elanikku: ~ 40%

Tallinna elanikkonnast

Ca 175 000 residents: ~ 40% of the population of Tallinn

Üle 200 avaliku asutuse

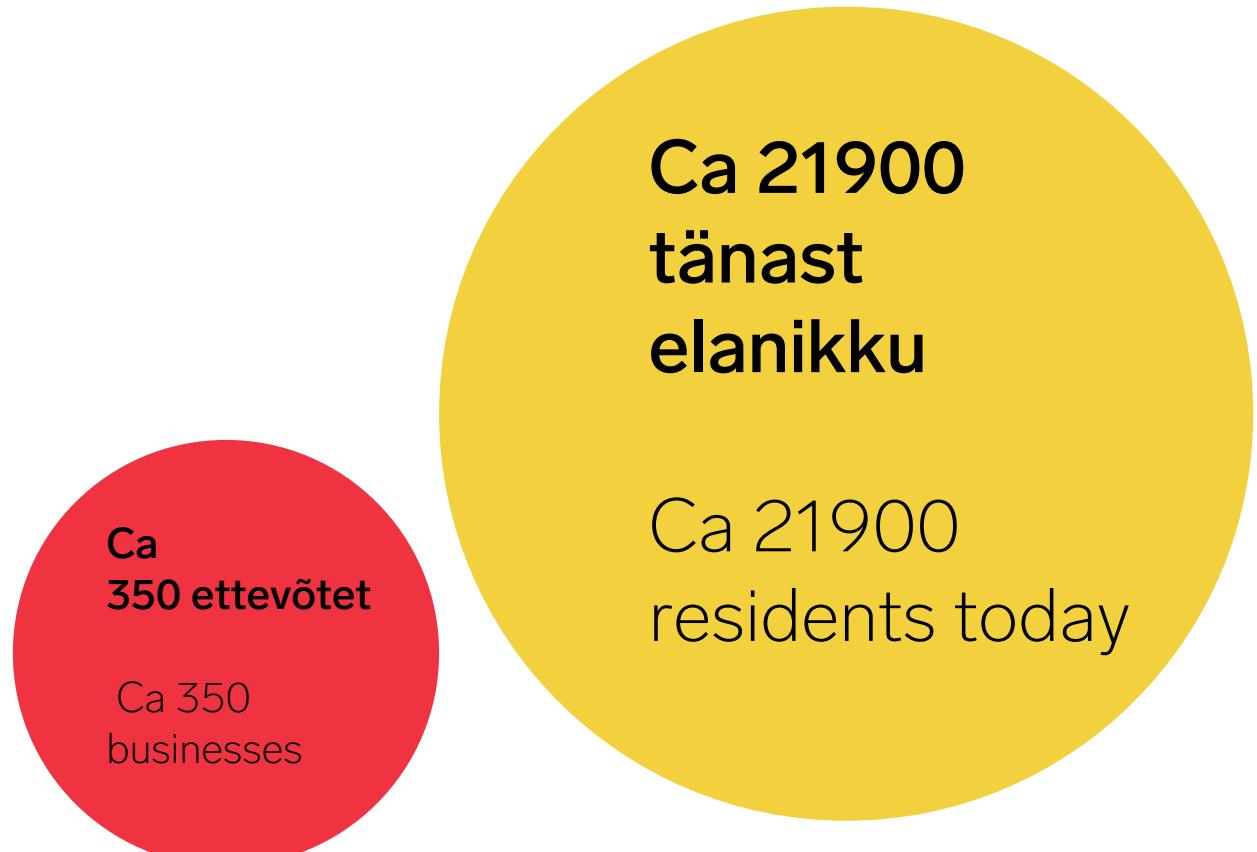

More than 200 public function establishments

# Elanikud & ärid Putukaväilal ja selle mõjupiirkonnas

## Residents & Businesses on the Pollinator Highway & Its Buffer Zone

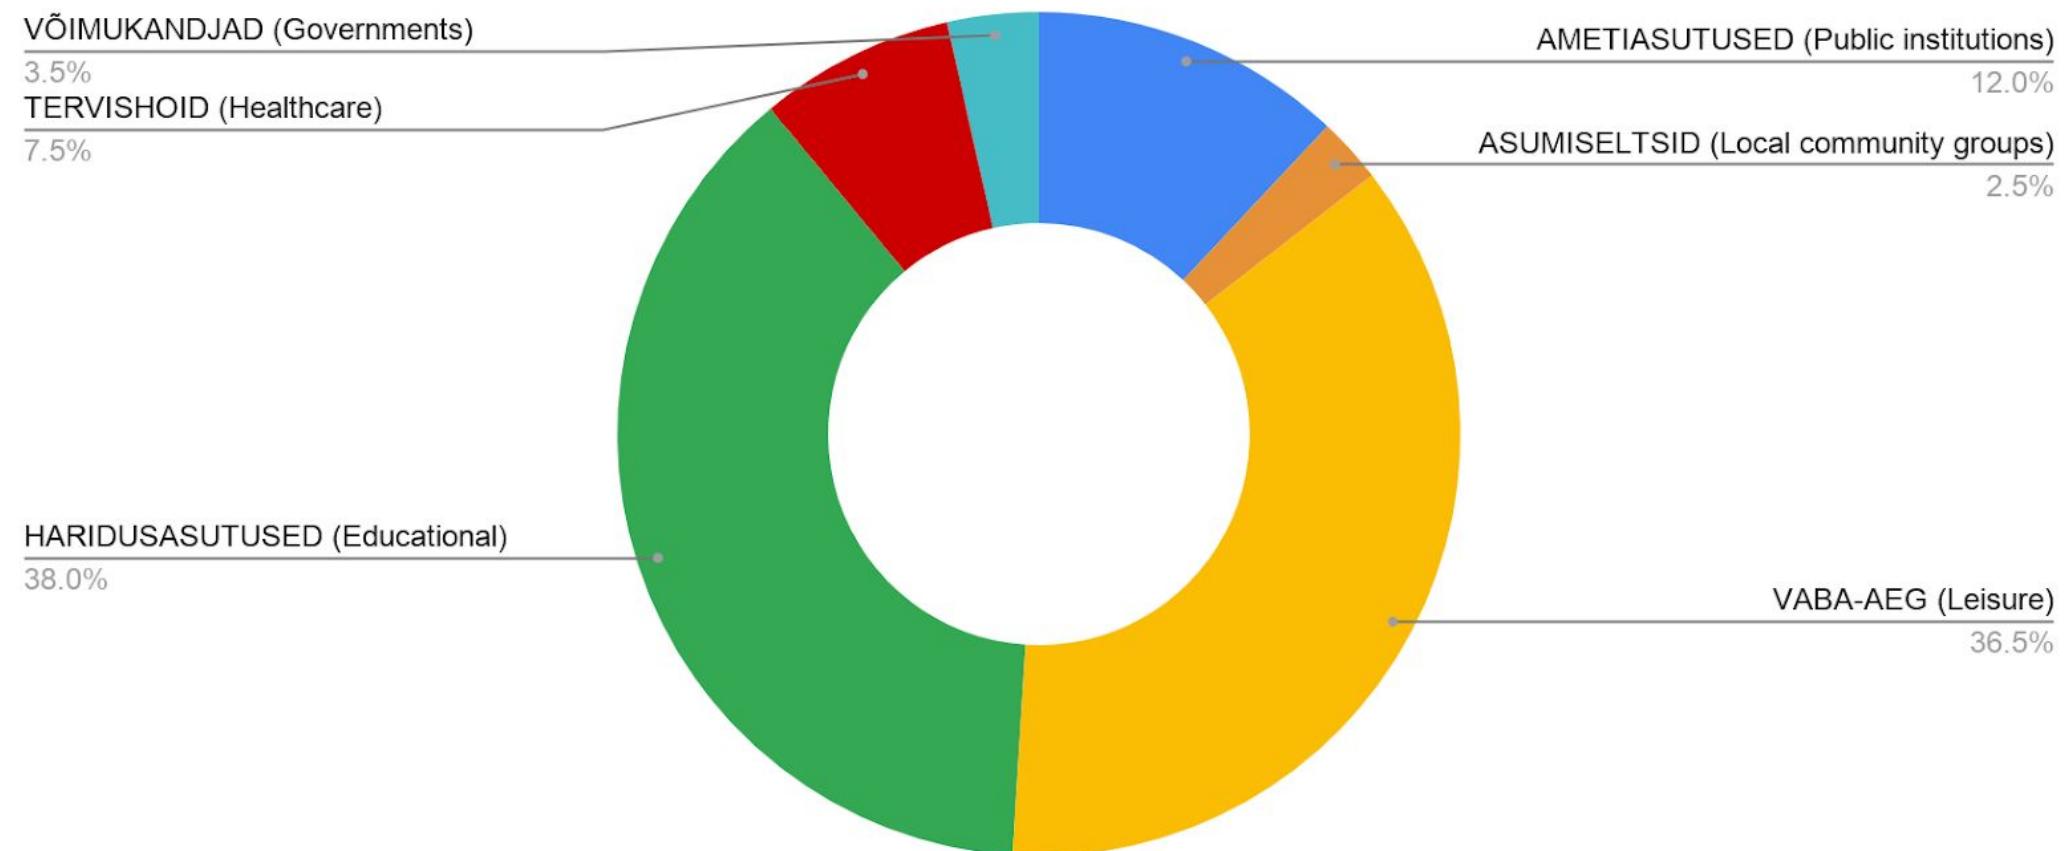

Planeeritud arendusmahtude realiseerumisel lisandub Putukaväila lähiümbrusesse järgmise 10 aasta jooksul ligikaudu **7500 elanikku.**

If planned developments are realized, **up to 7500 new residents** will move to the area over the next 10 years.

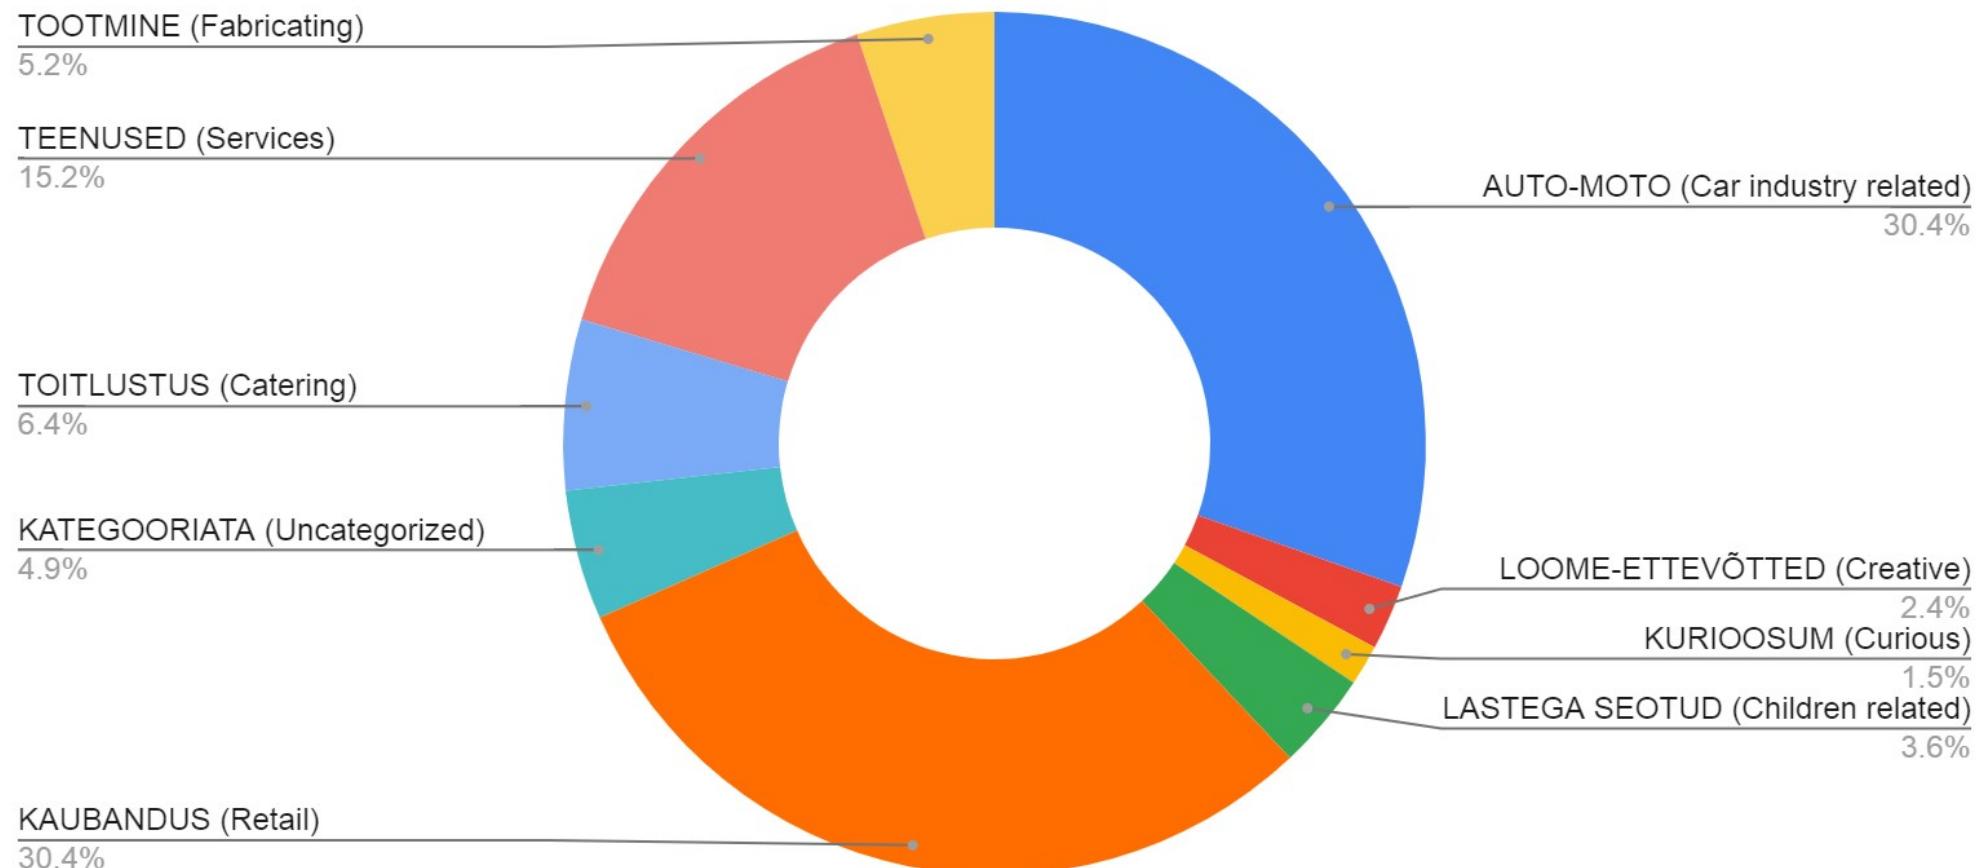

# Avalikud asutused

## Public Function Establishments

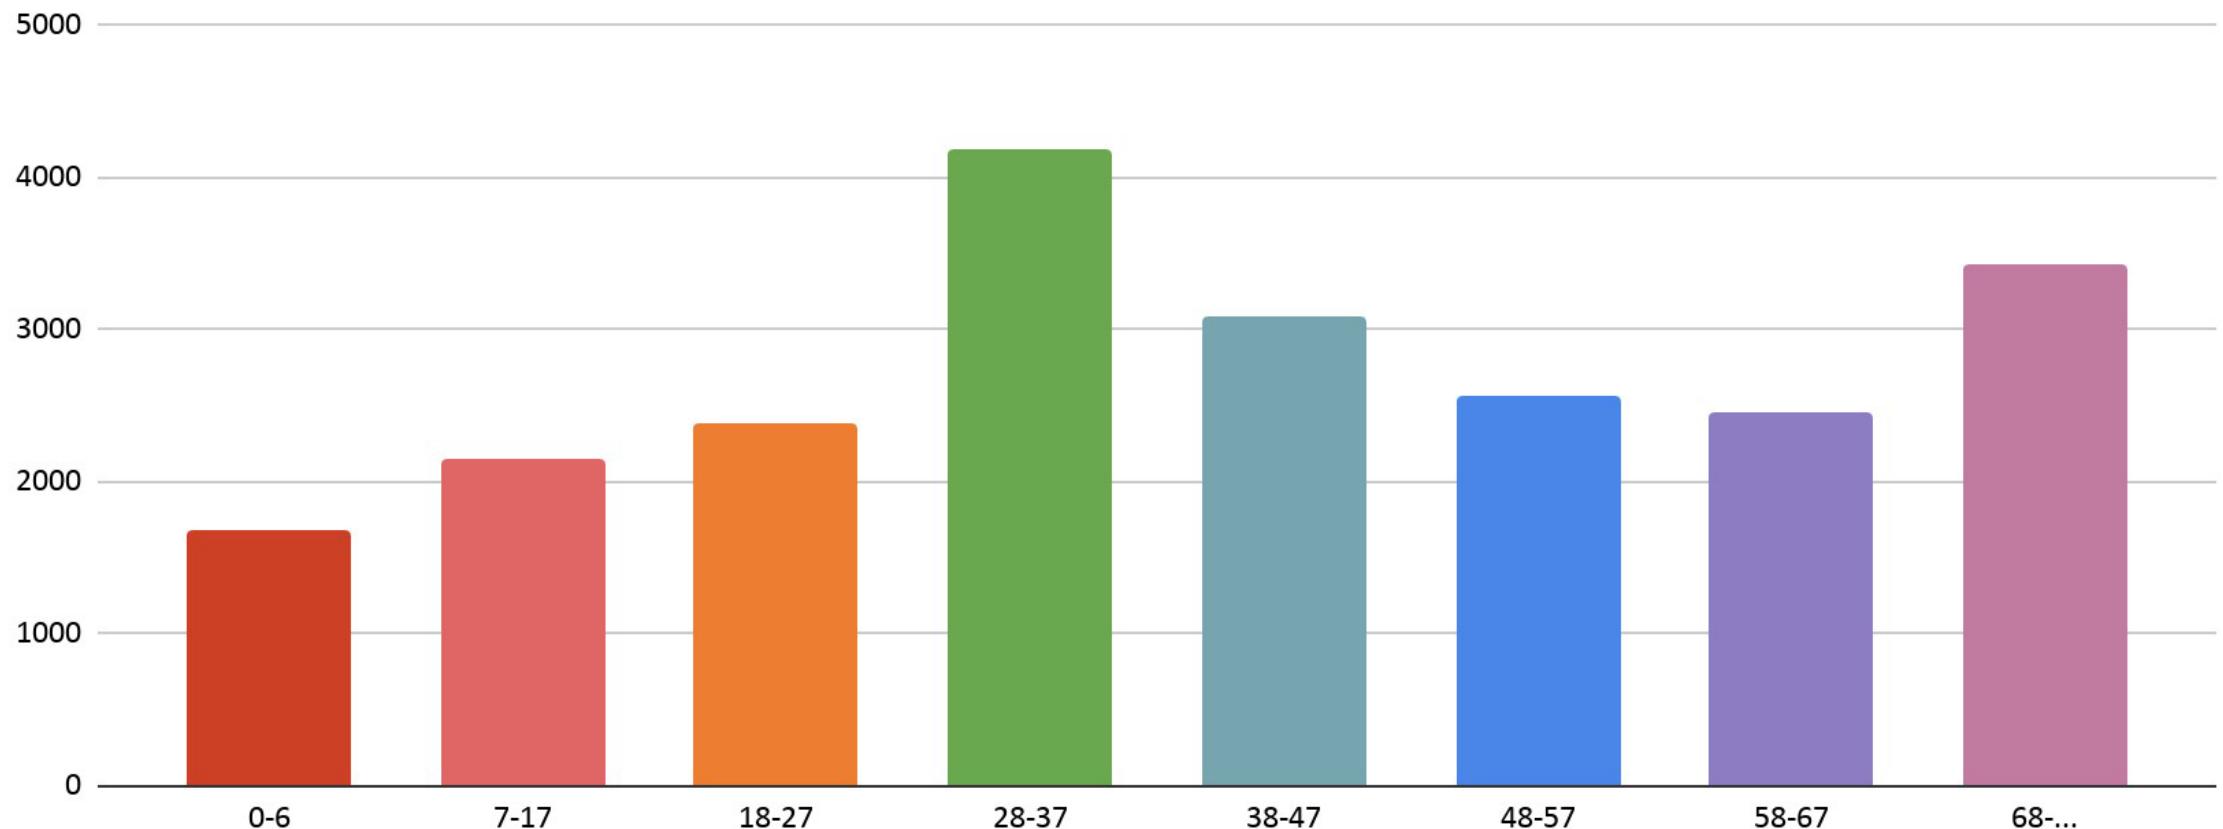

# Ärid ja ettevõtted Businesses

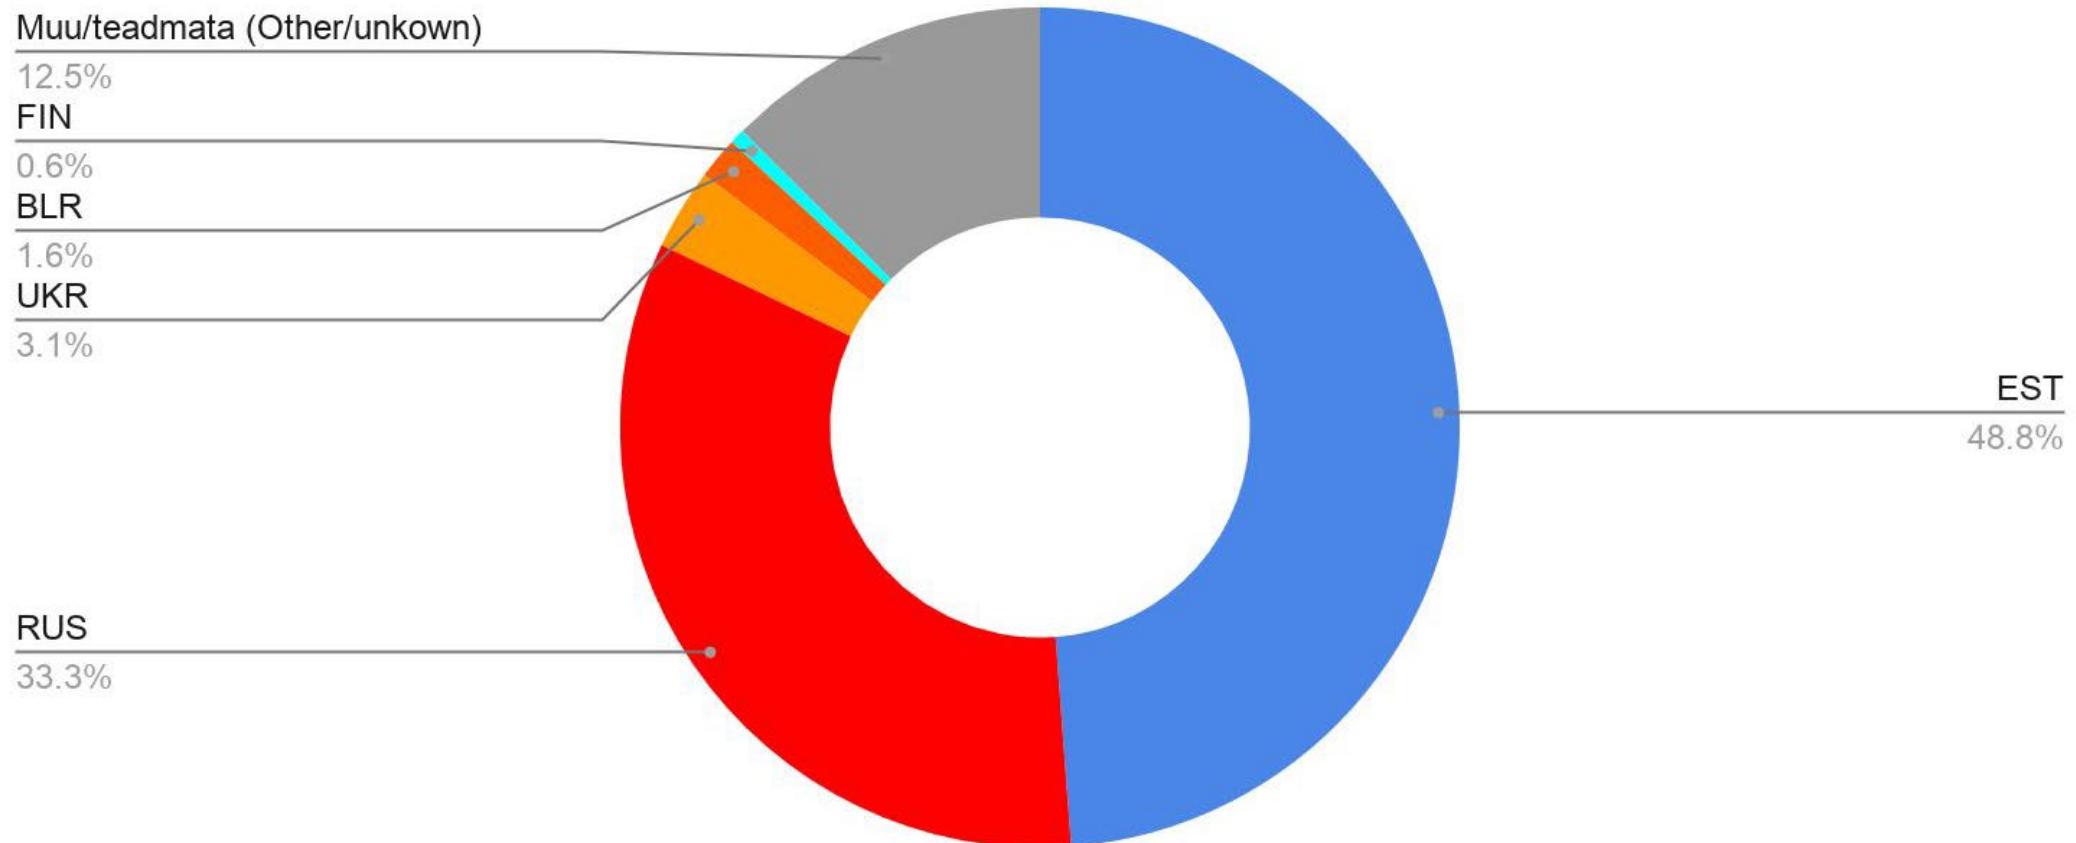

# Elanike vanus

## Residents by Age Groups

# Elanike rahvus

## Residents by Nationality

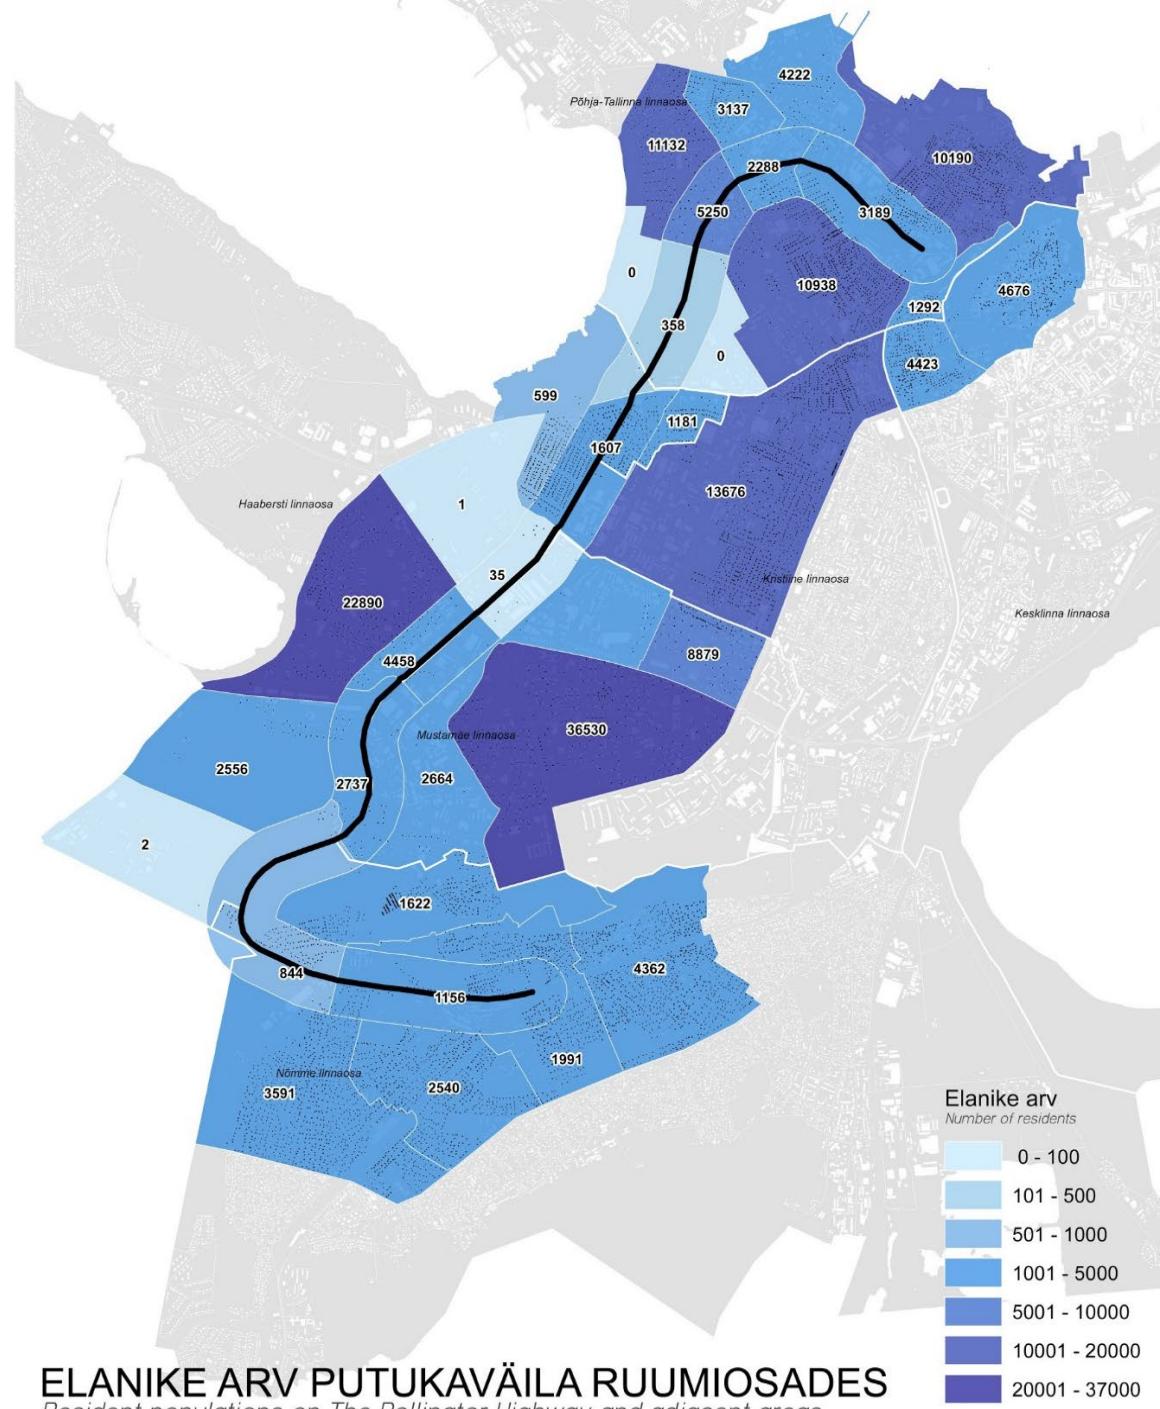

# Elanike arv ruumiosades

## Resident Populations on the Pollinator Highway & Adjacent Areas

Valdav osa Putukaväila potentsiaalsetest kasutajatest elab Mustamäe, Väike-Õismäe ja Pelguranna korterelamualadel, Kristiine väikeelamu- ja segahoonestusalal ning Kalamaja ja Pelgulinna korterelamualadel. Tihedalt asustatud piirkonnad vahelduvad looduskesksete aladega (Astangu, Veskimetsa ja Merimetsa), kus inimasustus on vähenen või puudub.

The majority of the potential users of the Pollinator Highway live in apartment building areas of Mustamäe, Väike-Õismäe and Pelguranna districts, in the small residential building and mixed building areas of Kristiine and in the apartment building areas of Kalamaja and Pelgulinna subdistricts. More densely populated areas alternate with natural areas (Astangu, Veskimetsa and Merimetsa) with little or no human settlement.

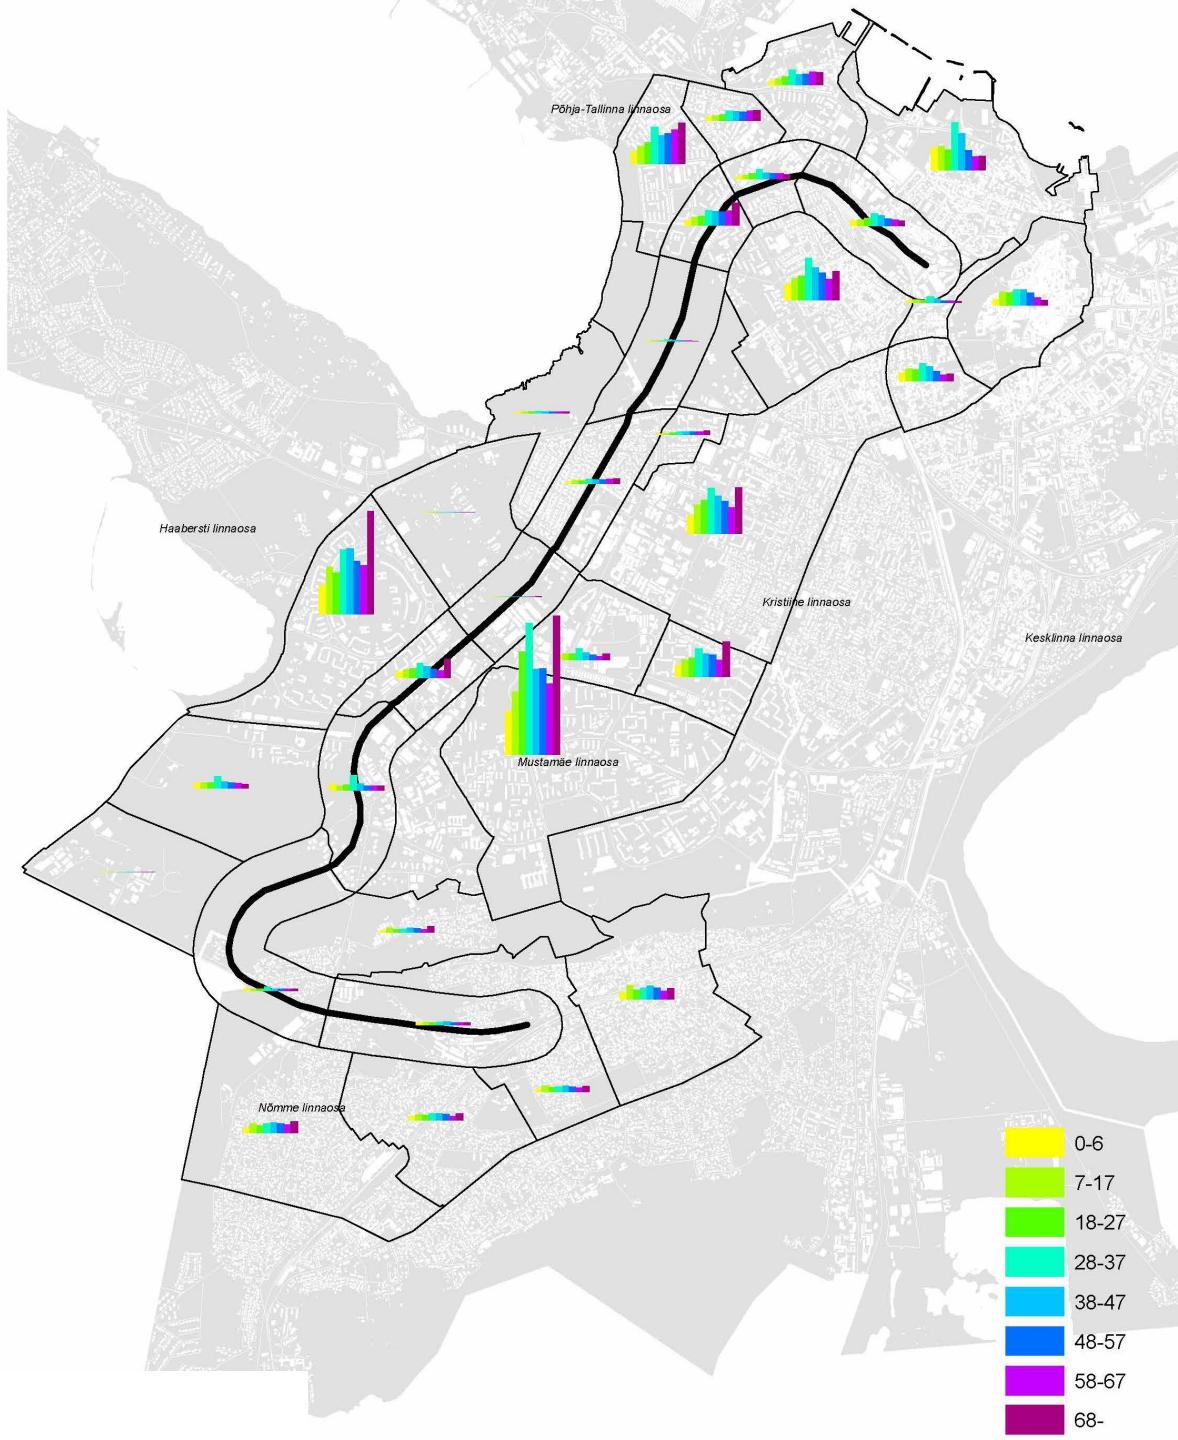

# Elanike vanuseline koosseis

## Residents by Age

Putukaväila mõjupiirkonnas on hästi esindatud kõik vanusegrupid; nõukogudeaegse ehituspärandiga korterelamualadel joonistub välja eakam elanikkond.

All age groups are well represented in the buffer zone of the Pollinator Highway. Older population groups are more strongly represented in Soviet-era apartment building areas.

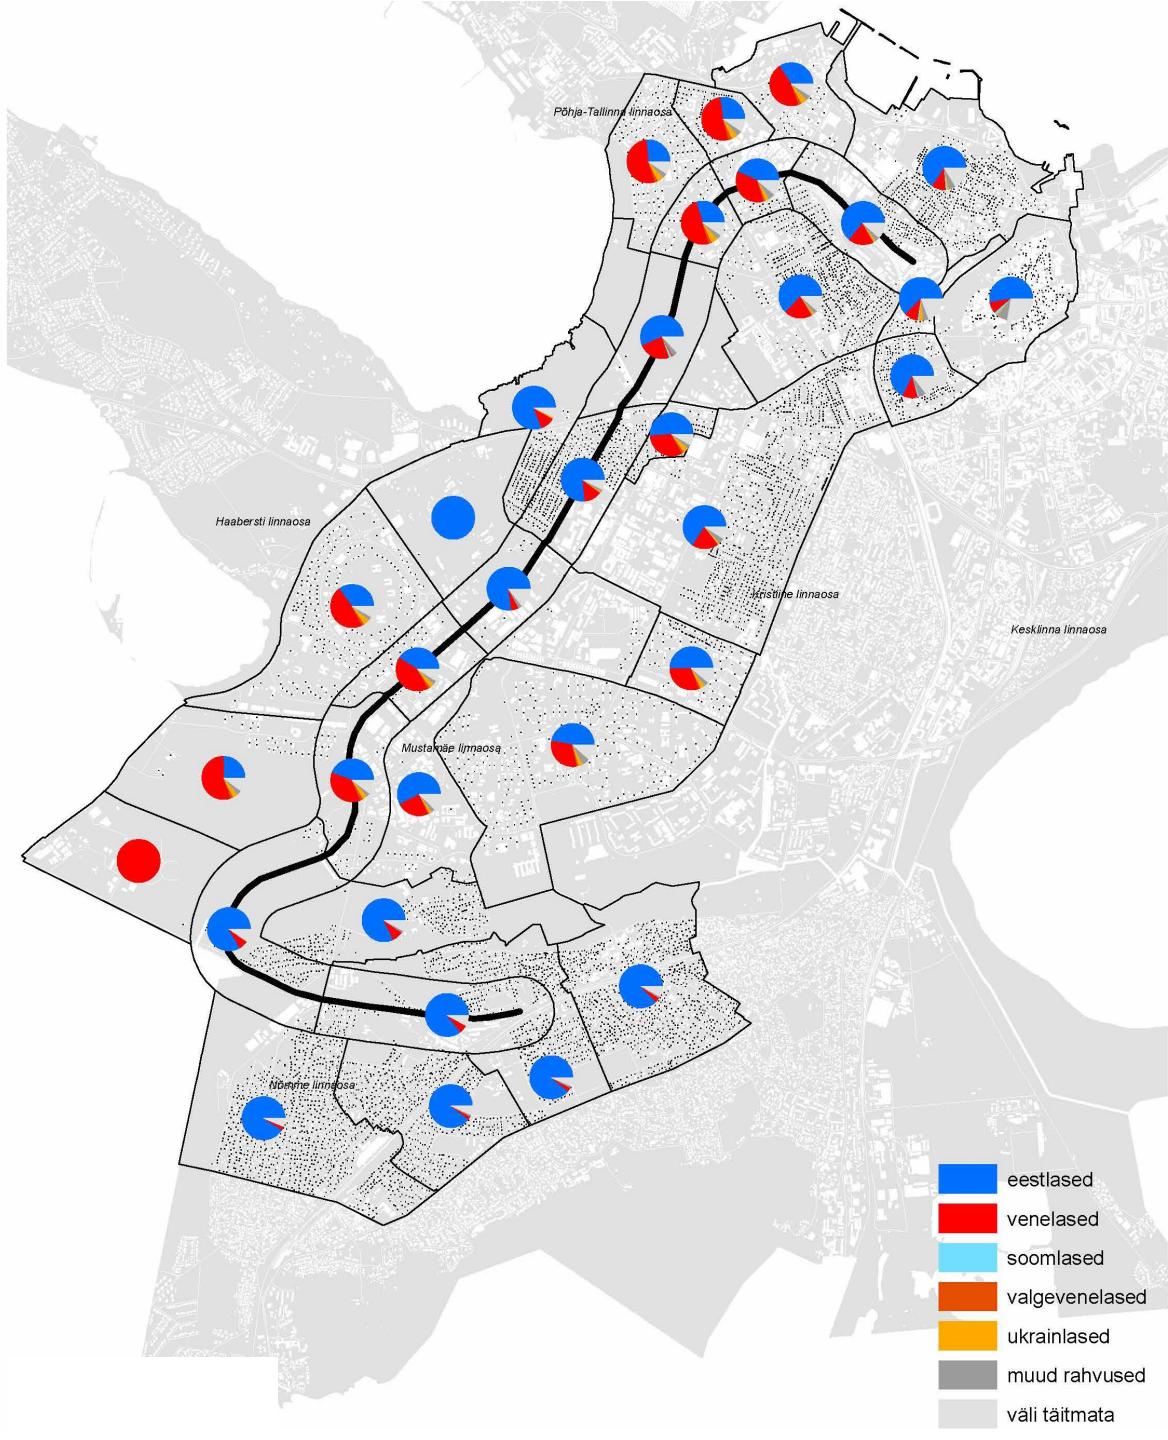

# Elanike rahvuskoosseis

## Residents by Nationality

Pere- ja väikeelamualadele, kesklinlikele ja kesklinnalähedastele korterelamualadele on iseloomulik valdavalt eesti emakeelega elanikkond. Suurem venekeelse elanikkonna osakaal on iseloomulik kesklinnakaugematele nõukogudeaegse ehituspärandiga korterelamualadele. Muu emakeelega elanikkonna osakaal on väike.

Single-family home and semi-detached housing areas as well as apartment building districts close to the city center are characterized by a predominantly Estonian-speaking population. A larger share of Russian speakers is characteristic to Soviet-time panel housing districts situated at a distance from the city center. The share of other nationalities represented is small.

# Elamute tüpoloogia

## Housing Typology

90% Putukaväila mõjupiirkonna elanikest elab kortermajades.

90% of the residents living within the Pollinator Highway buffer zone reside in apartment buildings.

118 Elamute arv

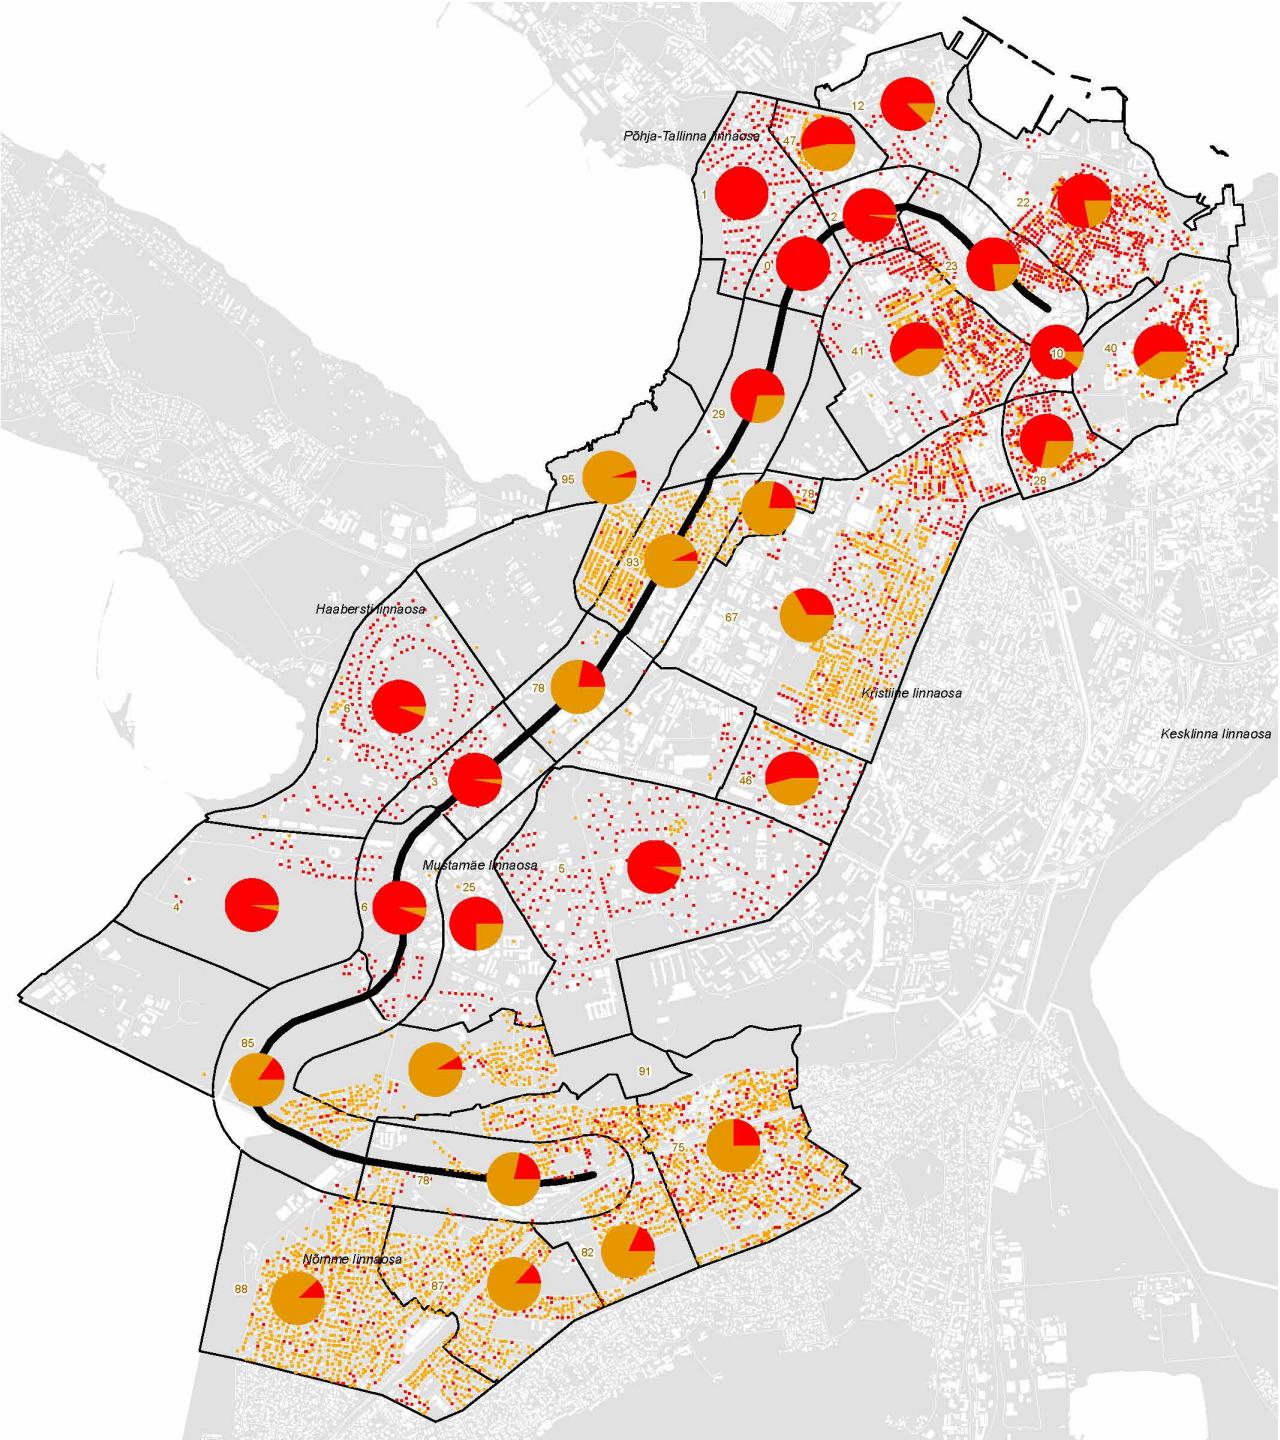

Number of residential buildings

■ Pere- ja väikeelamud

Single-family homes and semi-detached housing

■ Kortermajad

Apartment buildings

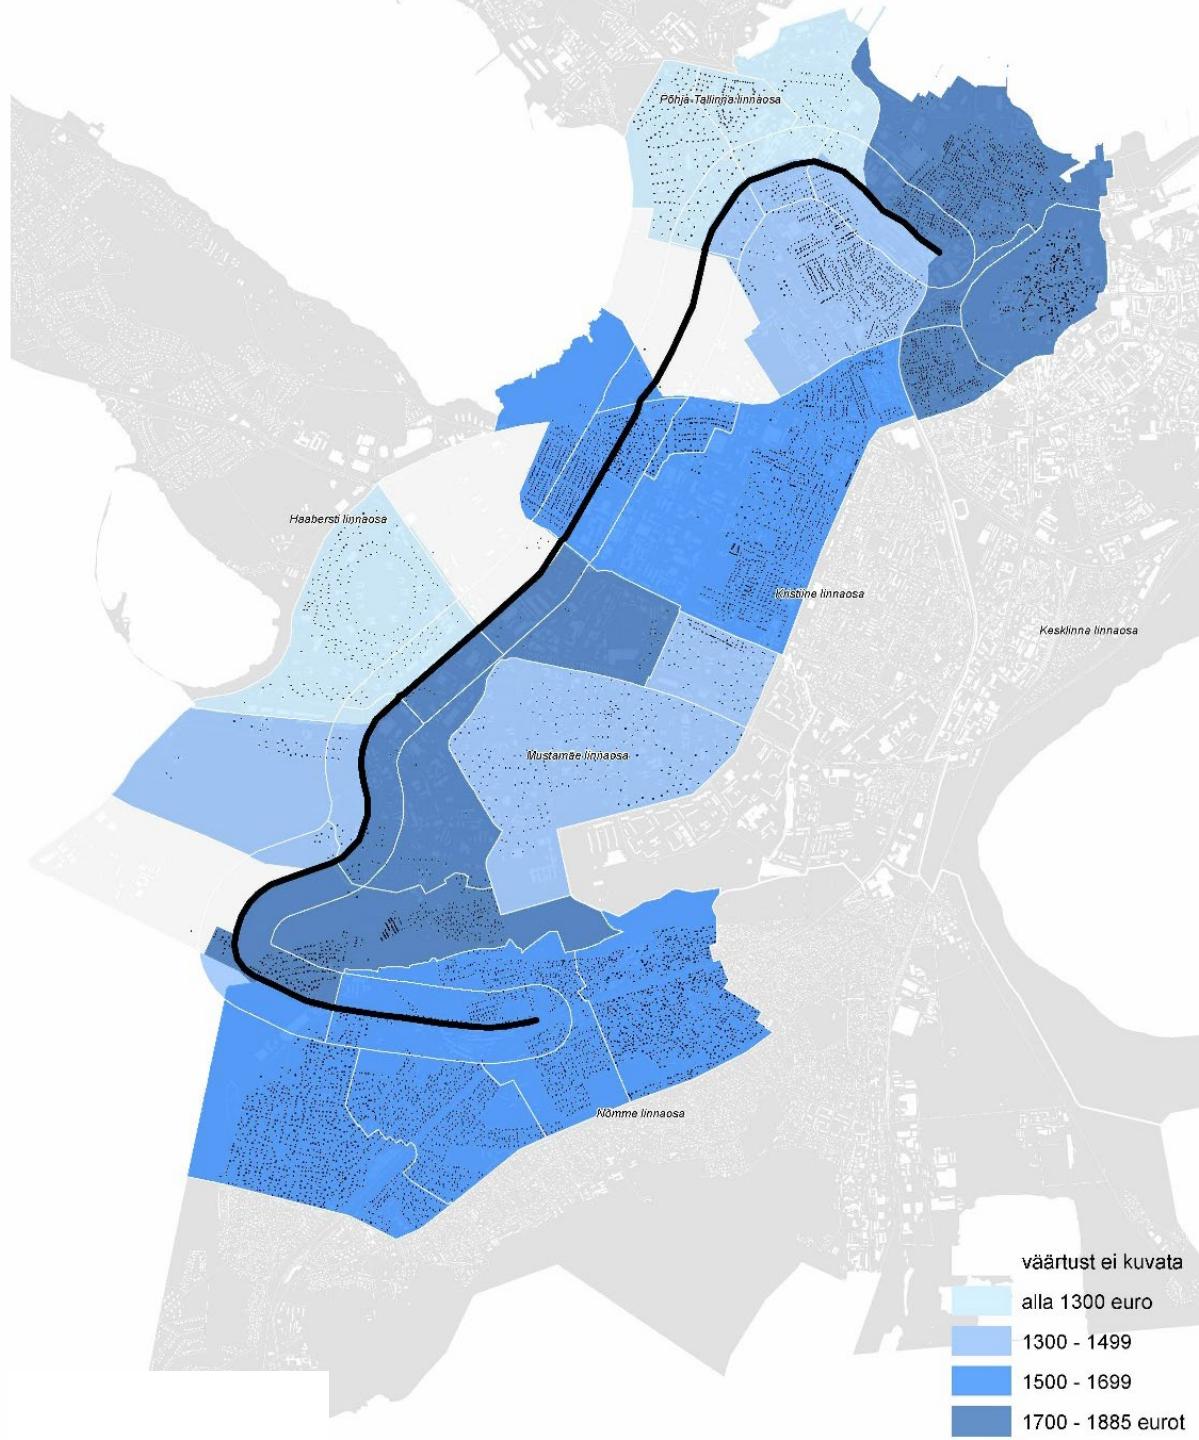

# Elanike sissetulek

## Residents by Income

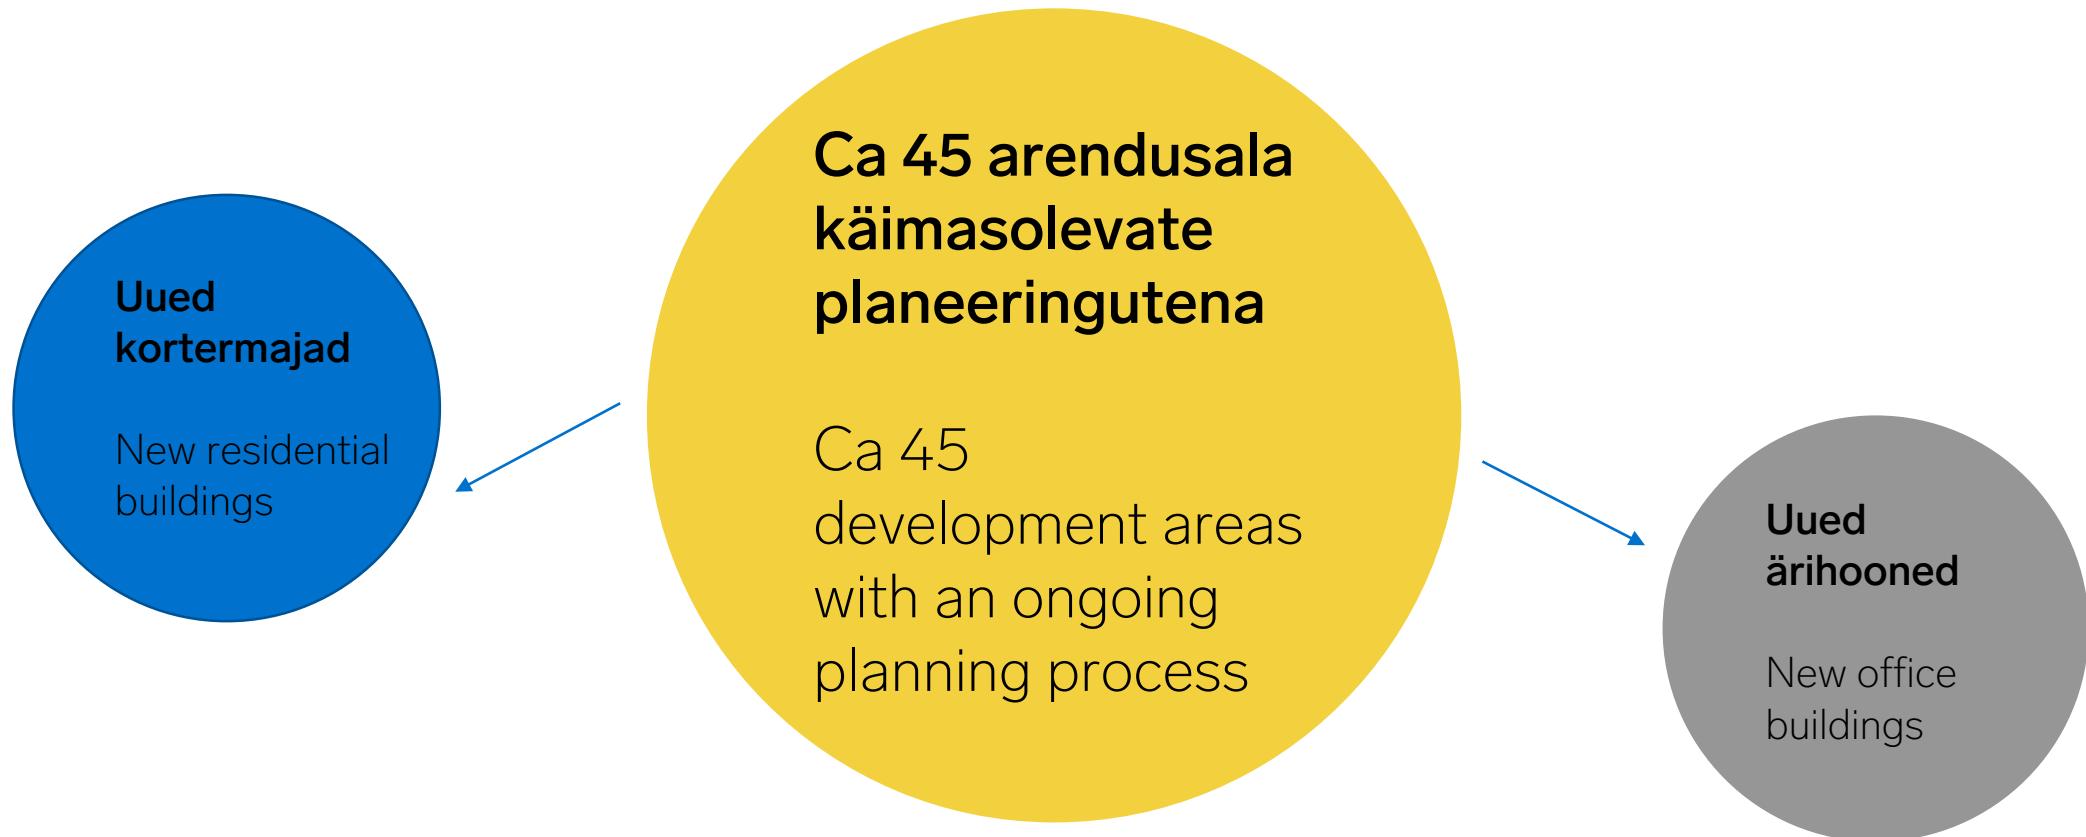

Suurema sissetulekuga elanikud on koondunud eramajade ja kesklinnalähedaste või kesklinlike asumite piirkonda.

Residents with higher income reside mainly in the single-family home areas, semi-detached housing areas as well in apartment building areas close to the city centre.

# Perspektiivsed arendused Putukaväila mõjupiirkonnas

## Prospective Development Areas in the Buffer Zone

# Maaomand Land Ownership

Munitsipaalomandis ja riigi omandis maad on potentsiaalsed alad ruumisekkumisteks.

Lands in municipal or state ownership are potential areas for spatial interventions.

## Menetluses detailplaneeringud

Areas of ongoing detail planning processes

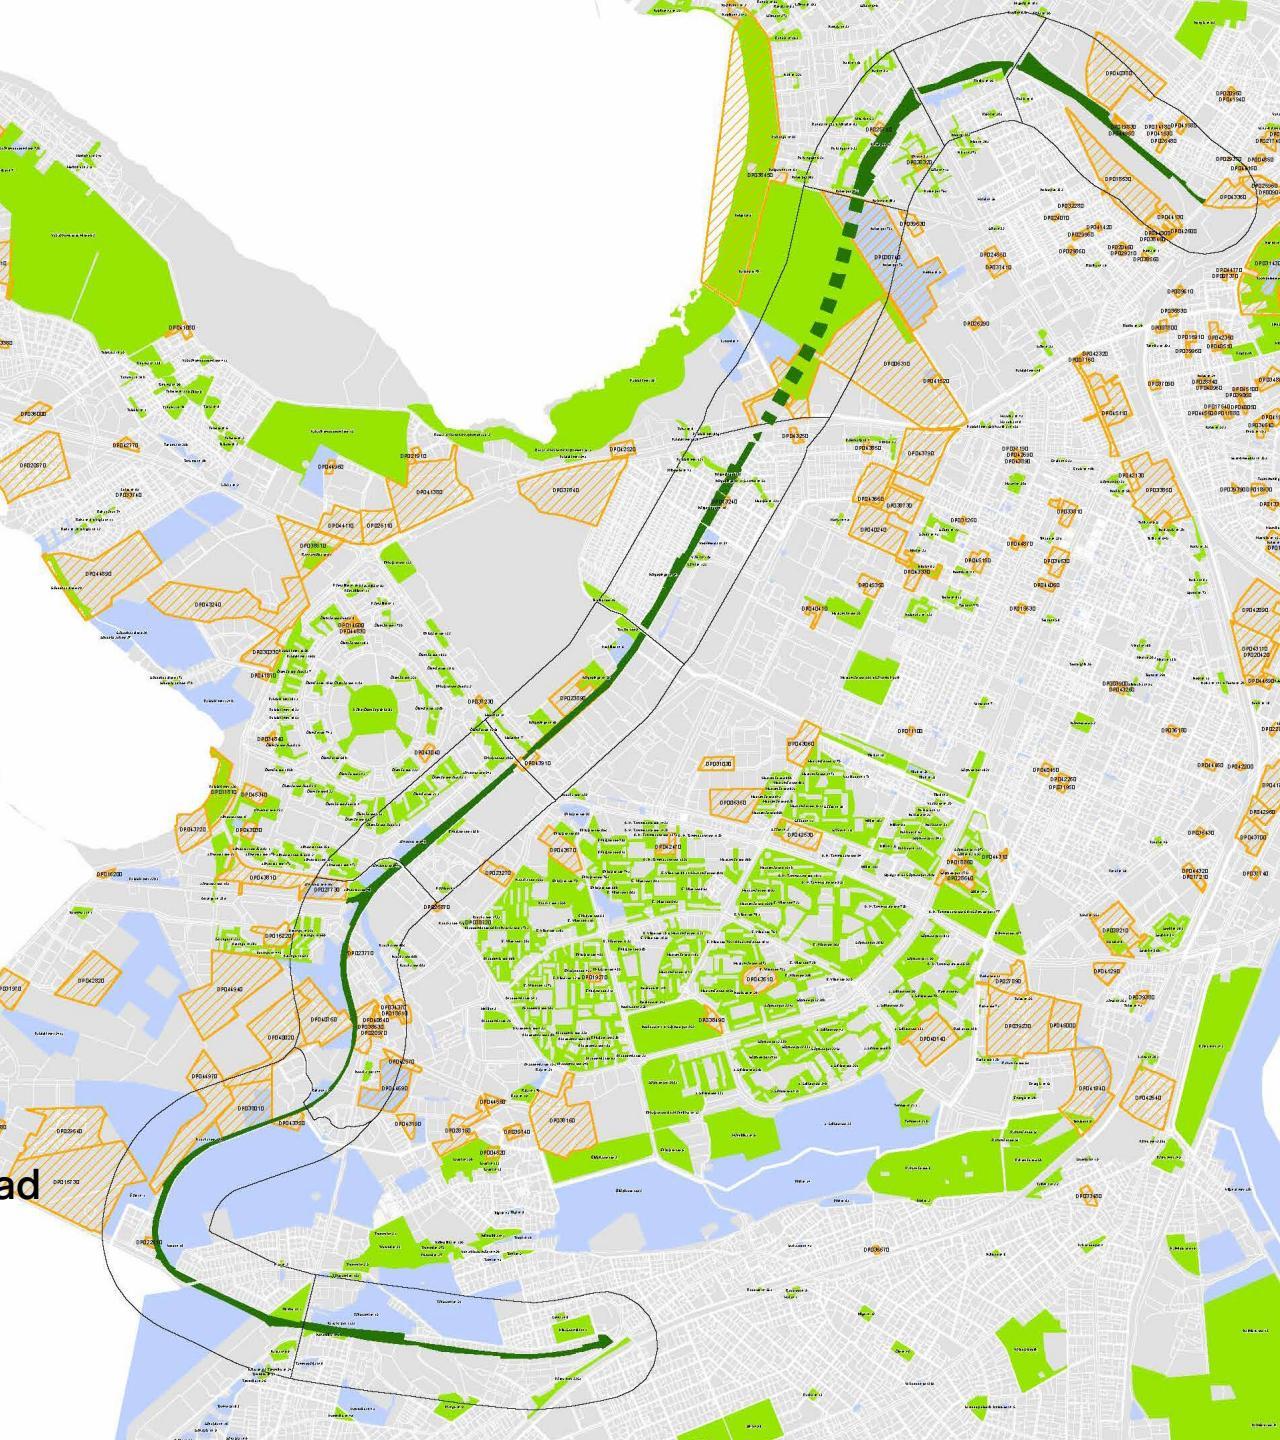

## Sotsiaalmaad (linn)

Land of social function owned by the local municipality

## Sotsiaal- ja maatulundusmaad, sihtotstarbeta maad

Land of social function owned by the state of Estonia
